

Krzysztof Radomski

Frontend Software Engineer with a Builder's Heart.  
Warszawa, Poland, CET

About

I am a product engineer with over seven years of expertise in building user interfaces. My passion lies in web technologies, and I am dedicated to enhancing user and team experiences through my work. While I specialize in React.js, my experience spans the entire software development lifecycle, from meticulous craftsmanship to architecture and leadership.

Work Experience

Netigate remote 2021 - Frontend Developer → Frontend Tech Lead

- JavaScript, Typescript, React, Redux, PrimeReact, Tailwind, Storybook, Playwright, Azure
- Migrated a customer app from jQuery to React; co-created a modern React app template now used in 12 production applications
  - Co-authored 2 component libraries and platform localization; created a custom ESLint plugin, 2 embedded widgets, numerous documents, reviews, proof of concepts and more
  - Author of the microfrontend architecture powering netigate
  - io/ex platform
  - I remove obstacles and help others succeed in all their frontend endeavors

Neofonie hybrid 2019 - 2021 Frontend Software Engineer

- JavaScript, Typescript, React, Redux, Material UI, HTML, CSS, Webpack, Freemarker, Jest
- Implemented support for numerous devices, including smart bulbs, blinds and shutters, cameras, alarm system and fixed numerous bugs in the browser client for Radamaher home automation system; later served as a part time reviewer and consultant on this project
  - Created numerous widgets, layouts and ui features for the new website for the Weser Kurier regional newspaper
  - Implemented numerous UI features, including infinite scroll lists, map support, css optimizations, file upload handling, and wrote tests to bring the UI code coverage to over 75% for a new consultant platform for HRS

Skillbill (now: Finx) remote 2019 - 2019 React Developer

- React, TypeScript, JavaScript, HTML, CSS, Jest, Formik, Redux, Material UI
- Contract work on maintenance and new features development on a realtime tv voting app, and an insurance manager helper PWA app

GogoApps on-site 2018 - 2019 JavaScript Developer

- React, Redux, Chart.js, Three.js, JavaScript, Gatsby, Typescript, Redux, React Testing Library
- I was the main frontend developer on a cryptocurrency news portal, and it was my first commercial React project
  - Later, I joined a team that worked on a series of educational applications for Arizona State University, where I contributed a lot of components and UI features
  - Also worked on company's website and few smaller projects and proof of concepts

QuarticON on-site 2017 - 2018 Junior JavaScript Developer → Tech Support → Tech Support Lead

- JavaScript, SQL, HTML, CSS, PHP, AWS
- Implemented the main product – recommendation engine – for over 10 e-commerce platforms, also worked on data scrapping and data verification
  - Later, I transitioned into a tech support role

self-employed hybrid 2010 - 2017 linguist

- Polish, English, German
- Self-employed linguist, translator and ESL teacher

Education

University of Warsaw 2004 - 2009 Master's Degree in English Studies

Skills

Other projects

**ADP**

As the frontend architect consultant, I set the foundations for taking a Windows native payroll app to the browser. It has been a success and the project is scheduled for production.

2023/2024 Side Project

React TypeScript Kendo UI

Redux

**FAIRYTAILS**

A fairy tale generator that uses AI to create children stories from simple prompts. Paused due to unresolved issues securing a truly consistent image generation model, and lack of time.

2024/paused Pet Project

TypeScript Next.js Tailwind

Deno Postgres Open AI

**Teatr Wybrzeże**

New website for a Polish theatre. I created parts of the frontend, and most of the backend. Also, I was responsible for all devops work, and third party integrations like analytics, alerting, image hosting and mailing.

2022/2023 Side Project

Next.js Strapi Node.js

Tailwind

**math4kids**

A simple PWA and also a native app to play around with mathematical operations. It was a fun project to learn React Native.

2021 Pet Project React

React Native TypeScript

**Storybook Vitest Addon**

Developed a custom Storybook plugin to display unit test results in a the Storybook's component tab.

2021 Pet project React

Storybook Vite.js

**Tanks!**

A browser version of an old Nintendo game, Battle City. My own take at the classic arcade game, featuring realtime multiplayer using websockets.

2019 Pet Project Javascript

Socket.io CSS HTML

Firebase

**Compadre**

A random name generator, my first open source project.

2018 Pet Project Javascript
